

The 24th IEEE International Symposium on Parallel and Distributed Processing with Applications (IEEE ISPA 2026)

Kuala Lumpur, Malaysia
27-30 December 2026

Organizing Committee

General Chairs

Geyong Min, *University of Exeter, UK*
Nong Xiao, *Sun Yat-sen University, China*

Program Chairs

Huazhong Liu, *Zhejiang Normal University, China*
Rong Gu, *Nanjing University, China*

Program Vice-Chairs

Jiawei Huang, *Central South University, China*
Chubo Liu, *Hunan University, China*
Minchen Yu, *The Chinese University of Hong Kong, Shenzhen, China*

Local Chairs

Azreen Azman, *Universiti Putra Malaysia, Malaysia*
Xiangli Yang, *Zhengzhou University, China*

Workshop/Special Session Chairs

Shaojun Zou, *Hainan University, China*
Zhou Zhou, *Changsha University, China*

Publicity Chairs

Yangbo Jiang, *Zhejiang University of Finance & Economics, China*
Xun Shao, *Toyohashi University of Technology, Japan*
Tingting Han, *Hainan University, China*

Publication Chairs

Zhicai Zhang, *Hainan University, China*
Binbin Zhou, *Hangzhou City University, China*
Wenxuan Zhang, *Hainan University, China*

Web Chairs

Ren Li, *Hainan University, China*
Yongqin Zhang, *Hainan University, China*

Steering Committee

Minyi Guo, *Shanghai Jiao Tong University, China*
Liang Zhao, *Shenyang Aerospace University, China*

Call for Papers

IEEE ISPA 2026 is an international forum for original research on parallel, distributed, edge, cloud and large-scale computing systems. The conference welcomes academia and industrial researchers to share innovations on multi-core, heterogeneous clusters, P2P networks, AI computing architecture, blockchain security, big data analytics and pervasive services. ISPA series has been held annually since 2003 across Asia, Europe, Australia and North America. The conference includes oral presentations, poster sessions, tutorials, invited keynote speeches and special sessions. All accepted papers will be indexed by IEEE Xplore and EI.

IEEE ISPA 2026 Tracks and Topics

Track 1: Systems and Architectures

- Cloud computing and data center technology
- Migration of computations
- Multi-clouds environments, cloud federation, interoperability
- Energy management and green computing
- Wireless and mobile networks
- Systems and Architectures for artificial intelligence
- Distributed/parallel algorithms and application
- Social networks, crowdsourcing, and P2P systems
- Distributed file and storage systems, I/O systems

Track 2: Technologies and Tools

- Parallel and distributed computing paradigms
- Novel parallel programming paradigms
- Programming models for cloud services
- Code generation and optimization
- Compilers for parallel computers
- Middleware and tools
- Scheduling and resource management
- Reliability, fault tolerance, and dependability
- Generative AI, agents, and world model

Track 3: Applications and Services

- High-performance scientific and engineering computing
- Grid and cluster computing
- Pervasive and ubiquitous computing
- Databases, data mining, and data management
- Big data and business analytics
- Scientific cloud systems and services
- Internet computing and web services
- Software defined network and its applications
- LLMs powered by parallel and distributed computing

Track 4: Security and Block-chain

- Security in parallel AI systems
- Federated learning
- Blockchain-based applications and services
- Blockchain security and privacy
- Blockchain in cyber physical systems
- Scalability issues in blockchain
- Blockchain in edge and cloud computing
- Blockchain-based applications and services
- Decentralized blockchain-enabled AI systems

Important Dates

Workshop Proposal Due:	15 August 2026
Regular Paper Due:	30 September 2026
Author Notification Due:	30 October 2026
Paper Registration Due	30 November 2026
Camera-ready Submission Due:	30 November 2026
Conference Date:	27-30 December 2026

Paper Submission

All papers must be submitted electronically via EDAS at <https://edas.info/N35627>. Submissions must not substantially overlap with previously published papers or papers concurrently submitted to other journals or conferences. Full regular papers are allowed up to 8 complimentary pages, with up to 2 additional pages available for purchase (maximum 10 pages). Regular papers or special session papers are allowed up to 6 complimentary pages, with up to 2 additional pages available for purchase (maximum 8 pages). All papers must be formatted in the IEEE Computer Society Proceedings Format (templates available at <https://template-selector.ieee.org/>). All submitted papers will undergo a single-blind peer review process.

Paper Publication

Papers accepted by ISPA 2026 will be published by the IEEE Computer Society Press. All accepted papers will be submitted to IEEE Xplore and EI. Distinguished papers presented at the conference, after further revision, will be invited for submission to a special issue.

Special Issues

- **IEEE Transactions on Computational Social Systems:** Cyber-Physical Intelligence: State-of-the-art, Perspectives, and Challenges
https://www.ieeemcs.org/wp-content/uploads/2026/01/CFP_SI-on-Cyber-Physical-Social-Intelligence.pdf
- **Journal of Systems Architecture:** Security and Efficiency for LLM-Based Edge Intelligence
<https://www.sciencedirect.com/special-issue/328321/security-and-efficiency-for-llm-based-edge-intelligence>
- **Big Data Mining and Analytics:** High Performance Computing and Communications for Cyber-Physical-Social Big Data Mining and Analytics
https://www.sciopen.com/journal/message_news/get_by_id?id=2069618442316066818&issn=2096-0654
- **Computer Standards & Interfaces:** Security and Resilience of AI Agents in Digital Critical Infrastructures
<https://www.sciencedirect.com/special-issue/335299/security-and-resilience-of-ai-agents-in-digital-critical-infrastructures>

Co-located with Four Conferences as The IEEE AI for Science Congress 2026:
